PATENT APPLICATION

In re application of: Waldman, S.A. et al.

Serial No.: 09/819,252

Group Art Unit: 1642

Filed: March 27, 2001

Examiner: Yu, Misook

Title: Compositions and methods for identifying and targeting cancer cells of

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

alimentary canal origin

Assistant Commissioner for Patents Washington, D.C. 20231

Dear Sir:

DECLARATION OF DR. SCOTT A. WALDMAN UNDER 37 CFR 1.132

I, Scott A. Waldman, M.D., Ph.D., do hereby declare:

- I am the co-inventor of the subject matter claimed in the above-identified patent 1. application.
- 2. Experiments were performed by me or by others in my laboratory under my supervision to compare the level of expression of Cdx2 in samples of normal esophagus and esophageal cancer samples.
- 3. Cdx2 mRNA and B-actin mRNA were quantified by quantitative RT-PCR (qRT-PCR) on 17 samples including 4 samples of esophageal cancer and 13 samples of normal esophagus. B-actin mRNA was quantified as a positive control.
- 4. The data is shown in Tables 1 and 2, attached hereto as Exhibits 1 and 2.

Docket No.: TJU-2389 Serial No.: 09/819,252 PATENT APPLICATION Filed: March 27, 2001

5. The Y axis shows the ratio of Cdx2 expression to B-actin (Cdx2 copy #/B-actin copy #). The individual sample numbers are plotted on the X axis. In Table 1, the esophageal cancer samples assayed are shown as samples 1-4. The 13 normal esophagi assayed are shown as samples 7-19. Lanes 5-6 are blank.

- 6. The data in Table 2 demonstrate the expression of Cdx2 in the lowest-expressing esophageal tumor (Sample 2 in Table 1, which is Sample 1 in Table 2) compared to that in the 13 normal esophagi samples (Samples 2-14 in Table 2).
- 7. The data in Tables 1 and 2 demonstrate that Cdx2 is expressed in esophageal cancer but not in normal esophagus. The data in Table 1 show that the ratio of Cdx2 expression to B-actin expression is detectably higher for each cancer sample compared to each normal sample. Table 2 shows that even in the cancer sample with the lowest ratio, the ratio was significantly higher than that in the normal samples. The data in Tables 1 and 2 state that range of expression of Cdx2 (Cdx2 copy #/B-actin copy #) in tumors was 2.50-191.00 whereas in normal esophagus, it was 0.00-0.03. These data support the assertion that Cdx2 is expressed in esophageal cancer samples and not in normal esophagus samples.
- 8. A copy of the Abstract of Akashi Eda, Hiroyuki Osawa, Kiichi Satoh, Ichiro Yanaka, Ken Kihira, Yumiko Ishino, Hiroyuki Mutoh, Kentaro Sugano, <u>Aberrant expression of CDX2 in Barrett's epithelium and inflammatory esophageal mucosa</u>, Journal of Gastroenterology, Volume 38 Issue 1 (2003) pp 14-22 is attached hereto as Exhibit 3. The data reported therein indicate that Cdx2 is not expressed in normal esophagus.

9. I hereby declare that all statements made herein are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment or both, under section 1001 of Title 18 of the United states Code and that such willful false statements may jeopardize the validity of the applications and any patent issued thereon.
